

MUNICÍPIO DE TERRAS DE BOURO

«EDITAL»

2º Trimestre de 2026

De acordo com o Decreto-Lei nº 69/2023, de 21 de agosto, o Município de Terras de Bouro informa os consumidores dos resultados obtidos nas análises de demonstração da conformidade com as normas de qualidade da água definidas no referido diploma legal, relativamente ao 2º Trimestre de 2026.

A Divisão de Obras Municipais Água e Saneamento (DOMAS) realizou um programa de controlo de qualidade, apresentado à Entidade Reguladora dos Serviços de Água e Resíduos (ERSAR), com base no disposto no art.º 17 e que incide sobre o sistema de distribuição no Concelho de Terras de Bouro. Todas as determinações são realizadas no cumprimento das disposições constantes na Lei, nomeadamente no que se refere a parâmetros, frequência de amostragem, análise e métodos analíticos.

A repetição das amostragens e das análises demonstram que as eventuais não conformidades detetadas se devem a situações pontuais, que não tiveram continuidade ao longo do tempo, não havendo desta forma implicações na saúde pública.

Terras de Bouro, 07 de setembro de 2026

<https://www.cm-terrasdebourro.pt/servicos/agua-saneamento-e-ambiente/controlo-analitico-de-agua>

Informação complementar relativa à averiguação das situações de incumprimento dos VP (causas e medidas correctivas): PH- Valores de PH ligeiramente ácidos são características comuns das águas superficiais e subterrâneas da região, não tem implicações para a saúde humana. Alumínio-- Caraterísticas naturais (hidrogeológicas) da origem de água, não foram tomadas medidas porque as análises posteriores não confirmaram o Incumprimento,

<https://www.cm-terrasdebourro.pt/servicos/agua-saneamento-e-ambiente/controlo-analitico-de-agua>

Informação complementar relativa à averiguação das situações de incumprimento dos VP (causas e medidas correctivas): PH- Valores de PH ligeiramente ácidos são características comuns das águas superficiais e subterrâneas da região, não tem implicações para a saúde humana. Radão- Características naturais (hidrogeológicas) da origem de água, não foram tomadas medidas porque as análises posteriores não confirmaram o incumprimento.
